SECTION 4: FIRST-AID MEASURES

Inhalation: If vapor or mist is inhaled when material is heated, remove person to fresh air. If unconscious seek medical attention.

Eye Contact: Flush with water until irritation subsides. If irritation continues for 15 minutes seek medical attention.

Skin Contact: Wash area thoroughly with soap and water. If redness or irritation occurs seek medical attention.

Ingestion: Do not induce vomiting. Seek medical attention.

Note to Physicians: Not Applicable

Special Precautions/Procedures: Not Applicable

SECTION 5: FIRE-FIGHTING MEASURES

Flammability Classification: Not Applicable

Extinguishing Media: Dry chemical, foam, carbon dioxide.

Unusual Fire or Explosion Hazards: Containers exposed to intense heat from fires should be cooled with water to prevent vapor pressure buildup which could result in container rupture. Container areas exposed to direct flame contact should be cooled with large quantities of water as needed to prevent weakening of container structure.

Hazardous Combustion Products: Carbon monoxide, carbon dioxide, and other oxides may be generated as products of combustion.

Fire-Fighting Instructions: CAUTION: COMBUSTIBLE. Do not enter confined fire space without full bunker gear (helmet with face shield, bunker coats, gloves and rubber boots), including a positive pressure NIOSH approved self-contained breathing apparatus. Cool containers exposed to fire with water.

Fire-Fighting Equipment: Not Applicable

SECTION 6: ACCIDENTAL RELEASE MEASURES

Spill /Leak Procedures: Contain spill. Remove all sources of ignition. Absorb with inert material such as sand or clay.

Small Spills: Not Applicable

Large Spills

Containment: Not Applicable

Cleanup: Not Applicable

Regulatory Requirements: Not Applicable

SECTION 7: HANDLING AND STORAGE

Handling Precautions: Not Applicable

Storage Requirements: Keep container closed. Keep containers from freezing. If container develops a leak during storage, transfer to another clean one. Spillage may be cleaned using liquid detergent and water. Sometimes particles may crystallize and “fall out” of Sedisperse liquids during storage. This is usually a result of exposure to cold temperatures. It is corrected by warming the Sedisperse to 40 to 50°C and then vigorously shaking the liquid in a closed container to re-dissolve the particulates.

Regulatory Requirements: Not Applicable

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls: Not Applicable

Ventilation: Vent vapor if mist is generated.

Administrative Controls: Not Applicable

Respiratory Protection: Not required with normal use.

Protective Clothing/Equipment: Gloves not required with normal use. Eye Protection not required with normal use. No skin protection required for short duration exposure, use rubber clothing for prolonged or repeated use (gloves, aprons, etc.).

Safety Stations: Not Applicable

Contaminated Equipment: Not Applicable
